

SAFIT Taxonomic Literature Database
(Text only Version)

This file originated as an EndNote X library file. At present, the database includes all references cited in the STE and Master Source File as well as other taxonomic and ecological references applicable to western aquatic invertebrates. We anticipate that the database will be updated more frequently than the STE so updates will be posted periodically. Check the version date in the file name for the most up to date version. This file may be searched using the Adobe Search feature, but all keywords from the original EndNote library are not available in this format.

This list is not exhaustive. We encourage the SAFIT membership and other users of this database/list to submit new taxonomic and ecological references or older references we may have overlooked. References may be submitted to Austin Brady Richards (arichards@csuchico.edu) or D. Christopher Rogers (crogers@ecoanalysts.com) or any member of the SAFIT STE Committee.
